About Me

Hi, my name's Volodymyr and I'm a senior Java developer, have 5+ years of commercial experience.

During that time I participated in different projects: fin-tech, gaming, resource managment, and e-commerce. I was involved in long-term projects which gave me strong experience in various areas of software design and development.

My primary interests now are connected with Java. I like programming, reading professional books, studying new technologies, and implementing them in my day-to-day work. I am always open to new and accept challenges with interest and enthusiasm. I have very good skills in problem-solving. I am open-minded and goal-oriented and have an active teamwork attitude and quick learning ability.

Experience

Auto1

Senior Software Developer/
Team Lead

may 2020 - Present

<https://www.auto1-group.com>

It's Europe's largest wholesale platform for used cars. More than 60,000 partner dealers in over 30 countries actively digitize their used car business with AUTO1 technologies and services. More than 500 microservice are running in production.
